

Modernize Your ERP. Move Forward with Clarity.

Moving a complex SAP landscape to the cloud calls for more than a technical migration. It is an opportunity to simplify processes, modernize the ERP core, and create room for continued innovation.

Consulting Solutions helps organizations plan and execute the RISE with SAP journey to SAP Cloud ERP Private—aligning transformation choices with business priorities while protecting operational continuity.

A Clearer Path to Cloud ERP

Modernize the core

Move existing SAP ERP investments toward a managed private cloud environment with the depth needed for complex business requirements.

Improve the process.

Use process insight and discovery to identify what to standardize, redesign, or preserve before transformation.

Extend with purpose.

Connect systems and build appropriate extensions through SAP Business Technology Platform while working toward a clean core.

Keep evolving.

Connect systems and build appropriate extensions through SAP Business Technology Platform while working toward a clean core.

What Supports the Journey

SAP Cloud ERP Private

A tailored cloud ERP foundation with SAP-managed infrastructure and technical operations, subject to contracted scope and shared responsibilities.

RISE with SAP Methodology

A structured transformation framework with guidance, tools, and checkpoints to support planning, delivery, and adoption.

Transformation Capabilities

SAP business transformation tools, integration and extension capabilities, and relevant AI opportunities can support the journey; available entitlements depend on the agreement.

Start with the Right Transformation Strategy

The right path depends on your current SAP landscape, business processes, data quality, customization, integrations, and appetite for change. We help evaluate conversion and modernization options, identify dependencies and risks, and shape a practical sequence of work.

ACCESS → DESIGN → MIGRATE → OPTIMIZE

Understand the current state; define the target architecture and process priorities; execute and validate the transition; support adoption and continuous improvement.

How Consulting Solutions Helps

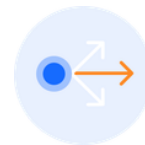

Strategy & Readiness

Landscape assessment, process discovery, roadmap development, and cloud transition planning.

Migration & Implementation

Data preparation, system conversion or migration planning, configuration, integration, testing, cutover, and go-live support using appropriate SAP methods.

Adoption & Optimization

SAP BTP extensions where appropriate, user enablement, change management, and post-launch improvement.

Is Private Cloud the Right Fit?

SAP Cloud ERP Private may suit organizations with established SAP investments, complex or industry-specific processes, significant integration needs, or a need to modernize at a measured pace. A readiness assessment helps determine whether the approach fits your landscape and goals.

Why Consulting Solutions?

SAP Cloud ERP Private may suit organizations with established SAP investments, complex or industry-specific processes, significant integration needs, or a need to modernize at a measured pace. A readiness assessment helps determine whether the approach fits your landscape and goals.

We've successfully guided organizations through complex SAP modernization initiatives using proven methodologies, proprietary tools and deep SAP expertise. From pre-project planning and business-case development through implementation, we help clients reduce risk, accelerate execution and achieve a more cost-effective path to RISE with SAP.

Ready to Plan Your RISE with SAP Journey?

Connect with our ERP & SAP Practice to discuss your landscape and explore a practical path to SAP Cloud ERP Private.
