

Your Business Evolves. Your SAP Landscape Should Too.

Mergers, acquisitions, divestitures, and organizational change demand SAP environments that evolve with your business.

Consulting Solutions helps organizations assess, plan, and execute complex data and landscape transformations across SAP ECC and SAP S/4HANA—aligning systems, structures, and data with business priorities while maintaining operational continuity.

Built for Your Next Business Move

Specialized SAP transformation solutions for complex business events.

Divestitures & Carve-Outs

Separate with Confidence.

Standard processes and SAP Activate provide a structured route from discovery to deployment. Timing depends on scope and readiness.

Company code carve-outs • Business unit separations
Selective data transitions • Plant reallocations

Organizational Change

Realign for What's Next.

Adapt SAP to evolving structures, financial requirements, and operating models.

Fiscal year changes • Organizational restructuring
Currency conversions • Company code realignment

Mergers & Consolidations

Integrate. Simplify. Scale.

Bring businesses and systems together in a more unified SAP landscape.

SAP system consolidations • Company code mergers
Client transfers • Post-acquisition integration

Data Harmonization

Create One Consistent Foundation.

Align enterprise data and financial structures across SAP environments.

Chart of accounts • Master data • Cost and profit centers
Customer and vendor alignment

Start with Clarity. Move Forward with Confidence.

Business-Focused SAP Transformation Feasibility

Our specialists assess the landscape, data dependencies, business requirements, and technical constraints to identify viable approaches and a practical roadmap.

Understand dependencies • Evaluate scenarios •
Execute with appropriate methods and technologies •
Confirm data integrity and business alignment

Beyond the Core Transformation

As requirements call for it, broader Consulting Solutions capabilities can support related analytics, custom application development, and process optimization.

ASSESS → PLAN → TRANSFORM → VALIDATE

Why Consulting Solutions?

✓ Specialized SAP Expertise

Our team brings 100+ combined years of SAP experience, 70% who previously worked for SAP and consultants with SAP certifications across our 250+ active client landscape. That depth spans both ECC and S/4HANA and is reflected in complex carve-outs, fiscal year and currency conversions, plant reallocations, data masking, system consolidation, and harmonization across multi-terabyte landscapes.

✓ Tailored Transformation Approaches

SAP SLO and DMLT methods, selective data transition, and appropriate SAP and third-party technologies are aligned to each landscape and business event.

✓ Continuity from Strategy Through Execution

Business-focused guidance and specialized delivery from feasibility and roadmap through transformation, validation, and adoption.

Proven Results Across Complex SAP Landscapes

Selected engagements show the scale and range of the work. Client identities are available under appropriate confidentiality terms.

Financial and organizational conversions

A 2TB currency conversion in six months; a 3.5TB shortened fiscal year in three months; and a 4TB fiscal year rollback in five months.

Global pulp and fibers | Divestiture

A multi-step separation across a 28TB+ SAP ECC estate in 8 months. The team cloned company codes, reallocated plants, renamed affected objects and interfaces, and deleted organizational units excluded from the sale.

Packaging manufacturer | Consolidation and harmonization

Profiling, mapping, cleansing, and consolidating data from more than 40 SAP and non-SAP sources into a single SAP S/4HANA platform, with site deployment and change support.

Global high-tech manufacturer | Landscape consolidation

A repeatable site-by-site migration approach spanning 15 locations and source platforms including SAP ECC, AS400, Oracle, and TM1.

Additional documented work includes data masking and database reduction in large SAP environments.
